

# PharmacyPro Update News May 2008

Used worldwide in over 3000 sites

## ScriptMAP

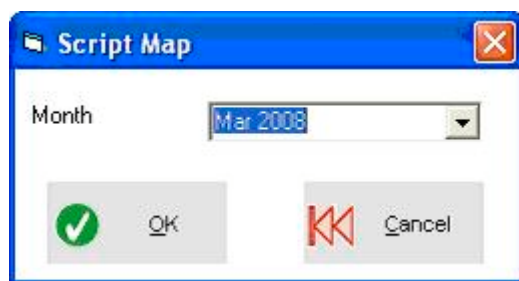

ScriptMAP is a new Guild service, available only to members. The Guild has worked closely with HealthSoft and other vendors to develop a standard data file that members can submit to the Guild for analysis. When you order your ScriptMAP report, you will receive a comprehensive report on the impact of the 1 August 2008 PBS Reforms on your pharmacy, based on your unique pattern of dispensing. The report also includes information to help you understand the reforms, a detailed analysis of your generic substitution rates, and the best areas to target for improvement.

See below for instructions or visit the Guild website [www.guild.org.au/scriptmap](http://www.guild.org.au/scriptmap) ...

## ScriptMAP

From the *PharmacyPro* Start Menu, go to Tools, Options. On the 'User Details' tab check you have the Owner's name, phone number and email address details correctly entered. From the PharmacyPro Start Menu, go to Reports - Other Reports - ScriptMAP Report.

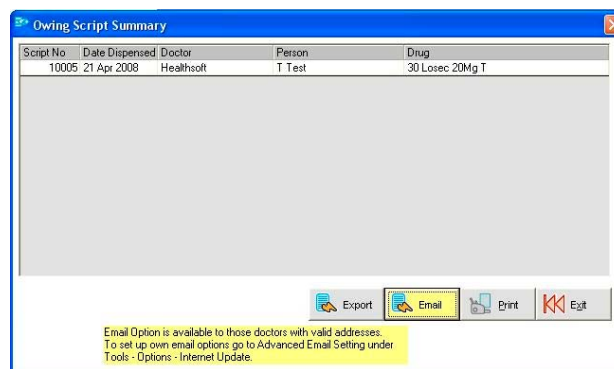

Select the month you want to send and click on OK. If ScriptMAP doesn't work, please contact HealthSoft to check that the .Net framework is installed correctly.

## Emailing an Owing Script Report to a Doctor

You can now quickly send an email to a doctor listing their owing scripts. To set this up, go to Tools - Options - 'Head Office' tab. Click on 'Advanced Email Options', tick the 'Use Advanced Email' option and enter your ISP / email settings.

To email the report, add the doctor's email address in the doctor utility (or go to 'Edit -

Edit Doctor' from the Script screen. After loading the Owing Script report - click 'Email'.

## Automatic Monthly Updates

After running this update you can flag "Auto download monthly updates". The monthly update will then download to your computer a few nights before the 1st, then on the last night of the month it will run the update, do the debtors rollover and forecast overnight and be ready for you in the morning with a message to say what has been done. This will save missed updates and also save time on the busy first day of the month.

To turn this on go to Tools - Options - Click on 'Internet Update' tab, and tick 'Auto Update'.
