

Proudly Supporting Australian Pharmacy for Over 25 Years    Used Worldwide in More Than 3000 Sites

## Welcome to New Users

A very warm welcome to this month's new PharmacyPro customers.

## Flood Relief

Our thoughts go to those of you affected by the floods. If we haven't already been in contact with you and you have been adversely affected, please let us know. We can help with some relief.

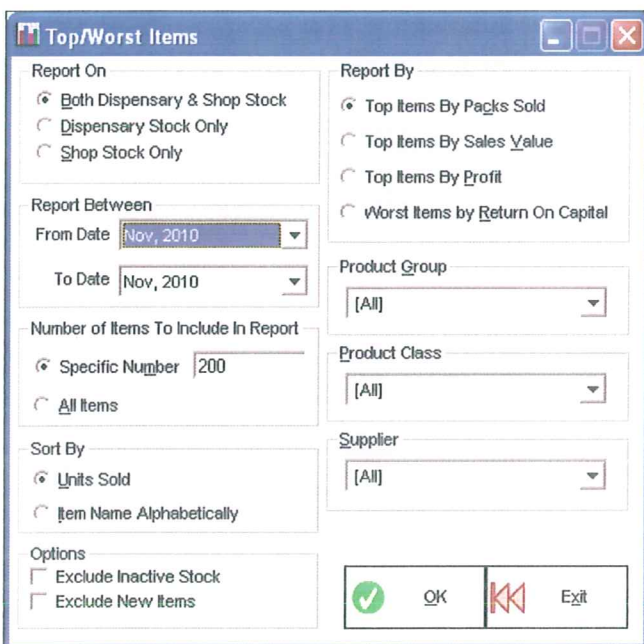

## New to PharmacyPro this Month

### DISPENSE

If the prescriber is a nurse or midwife and generic equivalent (F12) is selected, only indications from that type of prescriber will show.

### TOP ITEMS REPORT

The look of this report has been updated, and 'Include' and 'Exclude' options have been added.

The following new features weren't ready in time to be part of this update. However, if you'd like to start using them in February,

please let us know. Otherwise they will be in the March update:

### ORDERS

If a stock card has a stock note with an exclamation mark (!) at the end, it will display the note as a 'pop up' when the item is edited on the order (double click to edit), as well as when the item is added to an order.

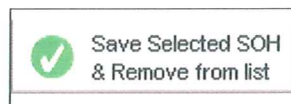

### SPECIALS

If an item is on special, the Special tab in stockcards is now yellow to make it obvious that it's on special.

### STOCKTAKE

You can highlight and save SOH for selected items only. This will save the changed SOH and remove the product from the list, leaving the remainder of the items on the stocktake list for counting in the future.

### Reapton

Please be aware that there are 4 different strengths of this drug.

Reapton 5/5 = Perindopril 5mg & Amlodipine 5mg

Reapton 5/10 = Perindopril 5mg & Amlodipine 10mg

Reapton 10/5 = Perindopril 10mg & Amlodipine 5mg

Reapton 10/10 = Perindopril 10mg & Amlodipine 10mg

### Stock Ordering

A pharmacist posted the following on the AusPharmList on 8 December 2010:

"We as pharmacists have a great deal of responsibility for the financial woes of our wholesalers. I never ceased to be amazed at the orders processed by wholesalers each day and the ridiculous quantities ordered by pharmacists. Large numbers of the profession order exactly what they used that day. Each day. For goodness sake why not order two weeks supply on the first of the month of your major sellers. It is one order placed, one order to check and receipt and put away and one large order for the wholesalers. WIN WIN WIN!"

... and "WE need the wholesalers. Let us wake up to ourselves now and order more efficiently and reduce extended credits or we will be bearing huge increased wholesaler costs or ultimately one wholesaler and then see what we will pay."

If you have accurate stock on hand and **follow *PharmacyPro*'s suggested orders** you can save something like \$10,000 - \$15,000 per year, EVERY year. That's a great boost to your bottom line.

*PharmacyPro* with its intelligent stock management reduces underperforming or "dead" products, promotes better-selling products and enables better shelf-space management. *PharmacyPro* will order more at the beginning of the month and less as you get closer to billing day.

#### **Please note:**

When entering an order for your regular wholesaler, choose 'General Wholesaler Order' as the Type of Order. Use 'Direct' Order for four (or more) weeks for other suppliers only. You shouldn't need to use 'Blank' and 'Re-order Sold Items'.

### Order Pfizer via DHL Direct & PharmX

You are now able to order Pfizer products directly via DHL Direct and the PharmX gateway.

All pharmacies wishing to trade with Pfizer need to register with a new Pfizer website, [www.pfizerdirect.com.au](http://www.pfizerdirect.com.au). This will initiate a process allowing you to trade with Pfizer via DHL Direct and the PharmX gateway. To download the Pfizer codes to *PharmacyPro*, go to Tools – Supplier Update and use the new "Pfizer" supplier.

### Let's Save a Tree - Statements by Email

We would like to email all our monthly statements. If you don't already receive our statements by email, please advise your email address for statements on the information slip enclosed, and fax it to us on 1800 006 207. We appreciate your assistance.

### Supplier Update

If you would like us to add the stock file of a particular supplier, please contact us with the supplier details. The following files have been updated in *PharmacyPro* this month:
